PROFESSIONAL SUMMARY

Python developer with 4+ years of hands-on Odoo experience: end-to-end implementations, custom module development, version migrations (v8 to v14) and long-term support for small and mid-sized companies. Background in technical support and QA for web platforms. Currently supporting a live Odoo deployment remotely.

TECHNICAL SKILLS

Languages & Frameworks: Python, Django, JavaScript, TypeScript, React, XML, QWeb
ERP: Odoo, Odoo implementation, Custom module development, Data migration, Odoo configuration, User training, ERP support
Tools: PostgreSQL, REST APIs, Git, Linux
Testing & Support: Web application testing, Bug reporting, API testing, Ticketing systems, Task automation scripts, Quality assurance, Technical support

EXPERIENCE

Odoo Developer — Ati Parvaz Air Travel and Tourism **2024-12 – Present · Remote · Contract**

- Implemented Odoo from scratch for a travel agency and modelled the company's existing business flows inside the system.
- Provide ongoing remote support, fixes and enhancements as the business's needs evolve.

Freelance Odoo Consultant — Self-employed **2023-06 – 2024-11 · Remote · Freelance**

- Delivered short-term, full-time contracts covering Odoo setup, deployment, customization and post-go-live support.
- Built front-end features with React and TypeScript for freelance client projects.
- Clients included MPA, Alvan Parand Shimi, Azin Did Faraz Novin and Akam.

Odoo Developer — Aria Baniz **2022-02 – 2022-10 · Full-time**

- Led the company's migration of data and custom modules from Odoo v8 to v14, rebuilding the project from the ground up.
- Developed new custom modules for business requirements not covered by standard Odoo.
- Retained after the engagement to provide system support on a project basis.

Technical Support & QA Specialist — Fanavaran Ettelaat Pishkhan **2018-05 – 2021-11 · Full-time**

- Supported several production websites; tested features, reproduced and documented bugs, and verified APIs.
- Handled user issues through a ticketing system, email, phone and social media; triaged daily queues by priority and escalated platform-wide bugs.
- Built a searchable FAQ / knowledge base that reduced repeat tickets.
- Wrote Python scripts to automate recurring support and reporting tasks.

Freelance Developer & Student — Self-employed **2010-10 – 2018-05 · Freelance**

- Full-time studies alongside freelance work, including building survey / data-collection forms for a client company and student project services.

PROJECTS

Travel agency on Odoo **(Odoo, Python, QWeb, PostgreSQL)**

- Full implementation from zero for Ati Parvaz: modelled the agency's real booking and invoicing flow inside Odoo, then stayed on for support and enhancements.

Odoo v8 → v14 migration **(Data migration, PostgreSQL, Custom modules, XML)**
- Led the migration of company data and custom modules across six major versions at Aria Baniz, rebuilding the project from the ground up.

This site: RAG over my résumé **(FastAPI, pgvector, Next.js, Docker, Anthropic API)**
- Résumé → embeddings → pgvector → Claude. Re-ranks sections against a pasted job ad; answers only from retrieved résumé chunks. Self-hosted with Docker on Oracle Cloud, CI deploys from GitHub.
